SUMMARY

BSc Computer Science (Hons) candidate, UWI, graduating 2026, with 6 years of professional experience in high-volume financial transaction monitoring, discrepancy investigation, and escalation. Hands-on SOC and cybersecurity skills built through enterprise GNS3 network security projects, secure systems development, and ongoing AWS and Microsoft Azure security training. Experienced with enterprise networking, TCP/IP, VPNs, routing protocols, ACLs, authentication, and cloud security fundamentals.

SKILLS

Security Operations: Security monitoring, anomaly detection, threat detection, incident response, incident escalation, incident documentation, root-cause analysis, access control

Networking & Infrastructure: TCP/IP, IPv4/IPv6, LAN/WAN, VLANs, VLSM, NAT/PAT, VPNs, ACLs, DHCP, DNS, NTP, EIGRP, OSPF, BGP, GRE, GLBP

Cloud Security: AWS security fundamentals, Azure fundamentals, Identity & Access Management (IAM), cloud infrastructure security

Tools & Platforms: GNS3, Cisco IOS, Linux, Python, PostgreSQL, GitHub Actions/CI/CD, Tailscale, Microsoft Azure, AWS

KEY ACHIEVEMENTS

- **Transaction Monitoring & Anomaly Detection:** Monitored high-volume financial transaction batches for 6 years, identifying discrepancies and deviations from expected patterns and escalating issues before they resulted in audit findings.
- **Network Engineering:** Designed and implemented two substantial GNS3 enterprise networking environments, applying routing, VPN, ACL, NAT/PAT, DHCP, DNS, NTP, redundancy, and multi-protocol routing concepts.
- **Systems & Security Development:** Designed and deployed full-stack applications incorporating authentication, authorization, databases, REST APIs, CI/CD, and cloud deployment, building practical understanding of application and infrastructure security.
- **Organisational Leadership:** Led a 35-member university student organisation, coordinating 6+ events per semester and establishing operational processes, stakeholder communication, and leadership structures from the ground up.

RELEVANT PROJECTS

Project Lead & Network Engineer | WAN Infrastructure & Network Security Lab (GNS3)

Jan-Apr 2026

- Designed and deployed a multi-router enterprise WAN integrating Frame Relay, eBGP, GRE VPN, NAT/PAT, ACLs, DHCP, DNS, and NTP using GNS3 and Cisco IOS.
- Configured and troubleshooted Frame Relay PVC/DLCI mappings, GRE tunneling, and inter-router connectivity, and implemented Cisco ACLs to control permitted traffic between network segments.

Network Engineer | Hierarchical Campus LAN Infrastructure & Multi-Protocol Design (GNS3)

Sep-Dec 2025

- Designed a multi-tier campus LAN using Cisco IOS, EIGRP, OSPF, GLBP, VLANs, and VLSM across a 39-subnet addressing scheme, configuring EIGRP across access/distribution layers and OSPF across the core/WAN edge with route redistribution.
- Implemented GLBP across core routers for active/active gateway load balancing and failover redundancy, and configured 39 DHCP pools, DNS, and centralised NTP services.

Lead Developer & DevOps | BigBackCooks - Kitchen Inventory & Recipe Platform

Sep-Dec 2025

- Designed and deployed a Flask-based application using Python, PostgreSQL, REST APIs, and JWT authentication, implementing access-control functionality and identity management.
- Built a GitHub Actions CI/CD pipeline to automate deployment, gaining practical understanding of the infrastructure and services security teams monitor and protect.

PROFESSIONAL EXPERIENCE

Senior Proof Officer | Bank of Saint Vincent and the Grenadines (BOSVG)

2017-2023

- Monitored high-volume daily financial transaction batches, identifying discrepancies and deviations from expected patterns and escalating anomalies before they resulted in audit findings.
- Investigated transaction discrepancies through detailed reconciliation of end-of-day records and ledgers, identifying root causes and resolving issues within strict operational deadlines.
- Applied established financial controls and procedures while handling confidential transaction data, maintaining accuracy and compliance across six years of operational experience.
- Served as a quality-control and escalation point in a high-volume environment, communicating issues clearly and coordinating timely resolution under strict processing requirements.

President | Vincentian Student Association St. Augustine (Vinsa STA), UWI

May 2024-May 2025

- Led a 35-member student organisation, coordinating executive responsibilities, membership communication, events, and stakeholder activities.
- Planned and coordinated 6+ events per semester, and developed the Vinsa Star Scholarship Program in collaboration with BOSVG to support Vincentian students pursuing higher education.

EDUCATION

BSc. Computer Science (Hons), University of the West Indies (UWI), St. Augustine, Trinidad and Tobago | Expected Oct 2026

Relevant coursework: Information Systems Security, Operating Systems, Computer Networks, Fundamentals of WAN Technologies / CCNA Prep
